

# AT THE SACRAMENTO

## Sensational Disclosures In This Great Mercur Mine.

### RICH ORE IN THE INCLINE

ROCK THAT GOES \$54.40 IN GOLD TO THE TON.

A High Extraction Being Made—Gold Mountain Mines—Representative of the Herald Inspects a Number of Properties—Advance In Sacramento—Mammoth Chronicles Gains and Is Popular With the Brokers—The Great Portland Mine—History of One of the Richest Producers in Colorado—Ore and Bullion—Silver and Lead—Mining Notes and Personalities.

Encouraging reports continue to come in from Mercur regarding the operations of the Sacramento mine, and The Herald is informed that in the incline from the mill tunnel level north towards the Matthe mine of the Mercur, some sensational disclosures have been made of late, and the ore bodies are gaining steadily in value.

On Sunday last careful watch was kept on developments in this portion of the property, the average value of the ore disclosed during the day running \$54.40 in the incline, and in the ton the entire workings being in a body of this class of ore, which is an excellent leaching product, the average value of the mineral broken out for the past ten days in the incline being over \$12 to the ton and up, and as work progresses this average is being steadily raised, the ultimate result of the work now in hand being a matter of conjecture, with the present outlook most flattering.

At the office of the company The Herald is informed that a high extraction is being made, while the values in the tallings are now less than at any time since the plant was started up, which is accounted for from the fact that the ore being treated is late coming principally from the workings of the lower tunnel, which is exceptionally good leaching mineral, while the values are excellent and very above the average rock that has been handled ordinarily in the past.

At the present time the mill is treating in the neighborhood of 125 tons of ore daily, but in the near future it is expected this tonnage will be increased to 150 tons per day.

In all portions of the Sacramento showing is most flattering, and there is reason to believe that in the near future it will easily rank as one of the greatest mines in Camp Floyd district.

### GOLD MOUNTAIN MINES.

Representative of the Herald Inspects a Number of Properties.

Richfield, Aug. 1.—For the past few days The Herald correspondent, in company with Thomas Gillan, a thorough and painstaking prospector of this city, visited the mines on Gold Mountain.

A considerable amount of newspaper talk has been going on for the past month, and to find as near the facts as possible this trip was made.

Commencing at the base of the mountain, the first property reached is the Bolitho-Hess placer diggings. At present there is no one at work on the property, but it is expected that a force of men will soon be put to work. This is the Bolitho-Hess placer diggings, and there to the Holland are several men at work on mines belonging to H. W. Ramore of this city. Charles Scott of Iowa and several others, but nothing can be learned as to the values received or the amount of work done on any of the properties.

After the Bolitho-Hess, the next property that is being worked on any extent is

### THE HOLLAND.

belonging to W. F. Snyder of this city. Six men are at work on a tunnel below their last year's workings, and at a distance of 57 feet their ledge was struck. The Holland is famous for the number of fine specimens which are taken from the next property beyond the Holland is the C. C. and J. C. belonging to E. P. Lynch of San Francisco. No work is being done in the mine at present, but W. F. Snyder of Salt Lake City has and is working on a contract by the owner of the mine to bring a stream of water from the head of Fish Creek, a distance of over five miles, to the property. As soon as the ditch is completed it is thought that the mine will be erected on the property and steady work will be continued.

At the Sevier mine there is only one watchman and Mr. and Mrs. Lammersdorf. This is about the best view of the mountain, and has been worked every summer before this, but litigation is at present holding General Manager Lammersdorf from doing any further work.

### IN THE SURPRISE

there are six men working in the lower tunnel. The owner, Mr. and Mrs. Cummings of Kanab, feel confident that they have one of the good mines of the district, and are doing everything in their power to develop it, and have some fine looking rock to show.

At present James Long, Jr., manager of the Mammoth-Breckenridge, has a bond on the Bunker Hill mine, owned by Lars H. Outson of this city, for \$5,000. The property is in a good location; has a well defined ledge running through it, and it is thought that some good results will come from vigorous work, which will commence in the very near future.

The Congress group, William Johnson, owner, is a promising group of four claims, which joins the Mammoth claim on the west. Through the claims runs a well defined three-foot ledge of fine looking ore. Mr. Johnson claims that in this ledge he has a pay streak of four inches. Last May a sample of this streak was sent to Salt Lake and tested. The returns of the assay were \$10 in gold and silver. The average of the ledge is about \$20.

The E. D. group is another group of claims belonging to William Johnson, and joins the Annie Laurie on the north and the Mammoth on the east. At present one man is at work on the property, and it is thought that the results of his labors will be high in gold and silver, as the vein is so situated as to have a rich vein of shipping ore.

### THE GOLD PAN

group, owned by Dwight Meeter and F. R. Shepard of this city, is a promising prospect, which joins the Blue Bird on the north. Last winter the owners worked the property and at the end of the tunnel have a well defined vein of good-looking decomposed quartz. Work will soon begin on a tunnel from the head of Deer Creek, which will be about 150 feet in this city, for a depth will be gained below their present workings.

The Golden Queen is a fine-looking prospect, owned by H. W. Rose of this city. At present there are three men at work on the property, and as the ore is similar to that of the Silver

King, the owner feels confident that he has a bonanza in sight. The mine is a new one, and is present for the Silver King, and no one is working the property. Only a watchman is kept at the property. The mine is owned by the late mining engineer, Mr. J. M. Provo, and a St. Louis capitalist is figuring on the property, as to the advisability of purchasing and the erection of the necessary buildings and the placing of the necessary machinery to treat the ore. The sale is supposed to come off about the 15th of August, and if it goes through, work will at once be given a force of men in the mill and in the mine.

There is nothing being done at the Bullion-Beech so far this summer. The only man on the property is a watchman, and it could not be learned what the intentions of the company were in reference to the future of the mine. Nothing has yet been said of the Mammoth-Breckenridge.

### THE ANNIE LAURIE.

or the Blue Bird. These three are without any doubt the main mines of the mountain, and from them great returns are expected, and upon the outcome of these mines will depend the future of the district. It is claimed by some that the ores in the district do not go down, but, as extensive work is being done on all of these properties, the report will soon be proven false.

It will be remembered that late last summer a rich strike was made on the Mammoth mine, which assured the value of the strike. During the winter no work was done on the property, and up to within the last fortnight a lawsuit was hanging over the mine, and no extensive work could be done. Since it was possible to get provisions into the mountain, only two men have been working. The work that is being done at present is the lowering of the shaft on the Mammoth on a ledge three feet wide. The pay streak in this ledge is from one to six inches in width. It has been estimated that the rock is worth \$54.40 in gold.

### IS LITERALLY COVERED

with the yellow metal, and specimens of the ore are being taken. The ledge is six inches wide, on which the point of a pin could be placed without touching the yellow stuff.

The general manager of the property, James Long, Jr., will at once put a force of men at work on a 150-foot tunnel to tap this rich strike at a depth of 57 feet. The property will at once be put in condition for full production, and are proven to be permanent, and as soon as the manner of treatment is ascertained.

When the correspondent was at this property, assay receipts were received from F. M. Bishop of Salt Lake City, dated July 27. The sample that was taken was from the lower tunnel, and gave 35.60 ounces in silver and 87 ounces in gold, making a total value of \$1,739.20. If these values continue, it cannot help but make the mine one of the most successful mines on the mountain.

Everything that has been said heretofore about the recent strike in the Annie Laurie, and the fact that the present ledge has been followed for 137 feet and still continues as rich as ever. The pay streak in the mine is from one to six inches in width, and from all reports, as distance is gained. At present there are eight men employed in the mine and two men sacking and sorting ore. A shipment will be made about the 15th of next month, and upon the result this will depend largely the future of the mine.

The Blue Bird is the only mine on the mountain that has ever paid a dividend. The mine is owned by the Golden Star Mining & Milling company and at present is looking the best that it ever has. Two cars of ore were shipped last month, and another shipment will be made in the near future. Eight men are at work stopping out ore in the upper drift, and two men are sorting the ore. The property has one of the best defined veins in the district, and is bound to pay.

The fish creek side of the district was not visited, but it was learned that extensive work is being done on the Advocate, Miller and several other prospects. D. S. Dorrity, A. Paxton and C. W. Watts, all of Kanab, have a bond on the Advocate for \$5,000, and are doing some extensive development work. Eight men are at work on the Miller, following the ledge and sacking the ore.

Andrew Ross of Joseph, and George Smith of Marysville, have discovered

### A NEW PROSPECT

just below the Miller. They claim they have found a continuation of the Miller ledge, and have four men at work on a tunnel to tap the ledge at a depth of about 200 feet. The property is being worked with considerable anxiety, as the Miller ledge is very rich in both gold and silver.

Captain Timothy Logan of the Golden Star company will visit his property about the 10th of this month, and, while there, will meet James Long, Jr., in regard to the building of the road through the canyon. A survey will at once be set to work giving grade to the teams, who will start grading in the very near future. This route will make the distance about six miles shorter, and will be a more gradual grade than the present route, and will make it possible for any one to climb the mountain to rich ledge, and makes a good one to take up 1,500 pounds.

### THE GREAT PORTLAND MINE.

History of One of the Richest Producers in Colorado.

Five years ago, says the New York World, James F. Burns was working as a plumber in Colorado Springs, and was one of the men who were able to earn \$25.00 a week. Today he is worth between \$5,000,000 and \$10,000,000. He is the president of the Portland Cement Co. of the kind in Colorado, perhaps in America. And he is 35 years old.

His experiences would fill many pages of this paper, and the man who has made himself so rich is a most remarkable one. It is known to every one in Denver. Burns had drifted west and five years ago he was working as a plumber's helper.

It is interesting to know that he was a good workman. One day he happened to overhear a young man talking to another. The accent was music to Burns' ear.

"Excuse me," he said, "are you not a 'down easter'?" You talk like a Maine man.

"From Portland," said the other. He was James Doyle, a printer.

"I'm from Portland myself," said Burns.

This was the beginning of a strong friendship. When the gold discoveries in Cripple Creek excited the world, the young men determined to seek their fortunes there. Burns hired two pack mules and with \$40 worth of provisions they went forth.

Doyle walked behind the mules as they slowly made their way up the Cheyenne canyon, where Helen Hunt Jackson is buried. He stopped to look at the valley of the Arkansas, Manitou and the Garden of the Gods.

"Let's stop here," James said. Burns: "I'm fagged out. I'll go on that hill and you go on that one yonder and we'll each locate a claim and be equal partners."

They were still five miles from Cripple Creek, but they thought the soil looked promising. Burns named his claim The Professor, because he had met a man who was prospecting who said he had been a professor in an eastern college. Doyle found only a fraction of a claim, a strip 75 feet by 111, that had been overlooked. He named his claim the Portland, in honor of his old home. The next day they pushed on to Cripple Creek.

At the end of two months they gave John Harman a third interest to assay the claims. This consists of digging two holes ten feet deep and testing the ore. During the next two months Burns and Doyle worked wherever they could get a job. They were hard pressed at the end of six months and

tried to sell the claims for \$50, but could find no purchaser.

After making a tedious climb along and offered \$500 for the claims—\$50 in cash. They were sold, but the claims reverted to the men who had located them, because the other \$450 was not forthcoming. They sold those claims no fewer than four times, and each time they reverted to the original owners because of an unpaid balance. The reason was that every year the last sale was for \$75,000, with a cash payment of \$10,000, the balance to be paid at the end of the year. When the year was up, again the balance was not paid. Burns and Doyle proceeded to develop the Portland, which had proved to be the most promising of the claims.

Within ten days they had uncovered a bonanza.

Burns was afraid to let anyone know of their luck. The Portland had been sold and resold so often that the title was clouded. He knew that if it were known that they had ore running into the thousands per ton, the working of the mine would be stopped.

After a hard day's work they would pack 100 pounds of ore down the steep grade under cover of night to the railway tracks, and there, every year, one knew that the Portland had paid over \$100,000 in bank.

Then a stock company was organized and the work was resumed. There was injunction after injunction, orders to show cause, orders of arrest and all manner of legal proceedings. At one time there was a fight against the Portland's owners. Burns detailed an armed squad of miners around the shaft house, and no one could break through, either above or below, armed with an order from the court.

Owners of adjacent claims said that their ore was being taken out through the Portland. By this time Burns and Doyle had paid a million dollars at their command. Every adjoining claim was purchased, and Burns carried through every suit successfully. The result was that the Portland claim of 75 by 111 feet has developed into the Portland Gold Mining company, of which Burns is president, with a capital of \$14,000,000, owning 125 acres of the richest gold mining property in the United States, comprising the Anna Lee, Bob Tail, Scranton, Portland, Vincitor, Captain, Portland No. 2 and Last Chance mines.

Burns is a man of strong convictions. He is a devout Catholic and a sound money man in a country where nine men out of ten are for free silver. He is a Republican, a his partner and dear friend, Doyle, was recently a candidate for the state senate on the Populist ticket. Burns sent a pile of money to defend his bid for office.

"Jimmy, you are a good boy," Burns would say to him, "but you have been badly advised in politics. You are always talking about free silver."

During the strike a lynching party assembled on Battle mountain with a victim. Burns rode up to the mob and talked to them.

"Boys," he said, "I know nearly every one of you. If any harm happens to those two men, I'll spend my last cent to run you all to earth."

The mob dispersed, and the two abandoned and the prisoners released.

There is a saying about Cripple Creek that "Jim Burns never goes back on his word."

### ADVANCE IN SACRAMENTO.

Mammoth Chronicles Gains and Is Popular With the Dealers.

A better tone was noticeable in the mining exchange yesterday, and advances were noted in the quotations in a number of the leading mines. As usual, nothing was done in the way of sales until Geyser-Marion was reached. 200 shares of this Mercur favorite changed hands at 76 cents with Grand Central was slumped, and dropped a board lot at \$6.85, the closing quotations being \$6.80 and \$6.90.

The 30-minute moved upward in a matter of minutes, and was good demand at \$18.75, sales being recorded at this figure. Mercur was also on the up grade, and before the close was wanted at \$7.30, although this bid was withdrawn to \$7.25 at the close. Sacramento was a surprise to many in the pit, and made splendid gains before the next stock was called for. The quotations being \$2 cents bid and \$2 asked. Utah touched 67 1/2 cents in the bidding, with the lowest offering at 80.

Chloride Point led the unlisted stocks in the way of sales, and made transfers at 97 cents. Dalton followed with a thousand share lot at half a cent, and disclosed upward tendencies. Swansea, which had been steady at 60, was bearded in the bidding, but firmly held. The balance of the list established only nominal quotations.

The transactions of the day were as follows:

### SALES OF STOCKS.

200 Geyser-Marion at 76 cents.  
100 Grand Central at \$6.85.  
200 Mammoth at \$18.75.  
200 Chloride Point at 97 cents.  
1,000 Utah at 67 1/2 cents.  
The closing quotations were as follows:

TEL. 505. 15 W. 2d So. St.

### Silver and Lead.

The silver and lead quotations yesterday were as follows:

Bar silver, 98 1/2 cents.  
Lead, brokers', \$3.30.  
Copper, casting, 10 1/2 cents.

### Ore and Bullion.

The ore and bullion receipts yesterday were as follows:

McCormick & Co., ores, \$14.50; bullion, \$5.00.  
R. Jones & Co., ores, \$14.00; bullion, \$5.00.  
Bamberger & McMillan, ores, \$7.75.

### Mining Notes and Personalities.

J. O. Swift of the Blackbird mine on the

# NERVOUS DEPRESSION.

(A TALK WITH MRS. PINKHAM.)

A woman with the blues is a very uncomfortable person. She is illogical, unhappy and frequently hysterical.

The condition of the mind known as "the blues," nearly always, with women, results from diseased organs of generation.

It is a source of wonder that in this age of advanced medicine science, any person should still believe that mere force of will and determination will overcome depressed spirits and nervousness in women. These troubles are indications of disease.

Every woman who doesn't understand her condition should write to Lynn, Mass., to Mrs. Pinkham for her advice. Her advice is thorough common sense, and is the counsel of a learned woman of great experience.

Read the story of Mrs. F. S. BENNETT, Westphalia, Kansas, as told in the following letter:

"DEAR MRS. PINKHAM—I have suffered for over two years with failing, enlargement and ulceration of the womb, and this spring, being in such a weakened condition, caused me to flow for nearly six months. Some time ago, urged by friends, I wrote to you for advice. After using the treatment which you advised for a short time, that terrible flow stopped.

"I am now gaining strength and flesh, and have better health than I have had for the past ten years. I wish to say to all distressed, suffering women, do not suffer longer, when there is one so kind and willing to aid you."

Lydia E. Pinkham's Vegetable Compound is a woman's remedy for woman's ills. More than a million women have been benefited by it.

### Salmon river, in Idaho, is in the city on

business.

Another shipment of ore is being taken out at the Four Aces mine.

A carload of high-grade Dexter ore is expected in today or tomorrow.

A shipment of cyanides is expected almost daily from the North Mountain mine and mill at Cherry Creek, Nev.

Marxville Pioneer. The new boarding house, to be built on the Marxville, is rapidly built and is being plainly from the Vale.

It is reported that Ike Decker is working his furthest drill in the development of the Indian girl with excellent results.

Drill is being employed in virgin ground and a strike may be made at any time.

It is learned that the Dalton & Lark

and that copper values are gaining with depth, the nine and 13-foot ore bodies on the Dalton & Lark are being worked up from 5 to 9 per cent in this metal, while the silver, lead and gold contents are holding their own in a pleasing manner.

As mentioned in Sunday's Herald, Frank Moorehouse has started out on a trip through the Deep Creek country, and is generally supposed that he is out on a prospecting trip for a prominent business and mining man of this city; but it is surmised by a local mining man that he is on the "push" here, and is getting in the field early, shows Arthur's fine political discernment. There is lots of fun ahead.

### CASTLE DALE POLITICS.

Emery County Is Sure to Roll Up Another Democratic Majority.

Castle Dale, Aug. 1.—Emery county's political thermometer has not indicated anything lower than fever heat for a month past. The county was precipitated by the contest over the election of a county superintendent of schools, and has abated nothing since the contest was terminated.

The Republican county convention for the selection of delegates to the state convention has been called to meet at Castle Dale on Aug. 10.

This county convention will be held upon a safe Democratic majority, and its reputation in this respect will doubtless be sustained this fall. A state convention from the district and a representative from the county are to be elected, and, in addition to the Democratic and Republican candidates, the state Republicans are expected to have a ticket in the field. This will make the fight interesting, especially so as there are a full set of county officers to be elected, and the probabilities are that the county will be a hotly contested field.

What the result will be no man knows, but the warriors are whetting their knives and the harvest of scalps promises to be large.

### DAVIS COUNTY SALARIES.

A General Out Made By the County Commissioners.

Farmington, Aug. 2.—The county commissioners spent the last half an hour of their regular session last evening in a consideration of the question of salaries for county officers for the ensuing two years. The result was a reduction for every officer in the county, except surveyor. Mr. Fisher was for a further reduction of some \$200 changes in the salaries of the officers.

The resolution passed as follows: Commissioners, each ..... \$ 240  
County clerk ..... 1,000  
Recorder ..... 800  
Attorney ..... 750  
Sheriff ..... 700  
Surveyor, \$5 per day for time actually employed, provided the whole amount paid in any one year shall not exceed \$100.

The new schedule reduces the annual salary of each commissioner \$30; clerk, \$10; treasurer, \$10; recorder, \$10; attorney, \$50; sheriff, \$50; assessor, \$30. The total annual saving to the county will be \$555.

### WHEAT ALONG BEAR RIVER.

Sheriff Abbott of Davis County Reports an Excellent Quality.

Farmington, Aug. 2.—Sheriff L. E. Abbott returned this afternoon from the Bear River country, whither he went yesterday to attend to some business matters. He reports that the grain crop in the district is of a very good this year, and the wheat which is now being threshed is of excellent quality. The yield per acre is extraordinary. A dry farm owned by J. D. Chubb, returned home a brother of the sheriff, produced 7 1/2 bushels per acre of good milling wheat.

The price of wheat has had a downward tendency since threshing began. The grain purchased by Corinne dealers is principally shipped westward to the coast. Great quantities are being handled.

### SEA SICK ON THE LAKE.

Pleasure Trip In Le Sieur's Yacht On Utah Lake Abandoned.

Provo, Aug. 2.—The Enquirer "boys" have given a formal challenge to the county officials for a game of baseball to come off in the near future.

Attorney J. D. Chubb returned home last evening from Strawberry, where he and family have been for the past week for a summer outing.

The crowd of Provo business and professional men who gathered for Point Pelican yesterday did not quite reach said point, as the boat rocked too much and made some of the passengers sick, whereupon they prevailed on Captain St. V. Le Sieur to return to port.

# NEWS FROM OVER THE STATE.

## CATTLE THIEVES CAPTURED, OPERATING ALONG THE LAKE.

Ten Head of Cattle Taken From Thomas Meinnot of Scipio, Millard County—Officers' Clever Work.

Eureka, Aug. 2.—Marshal Gus Hendrick and Deputy Sheriff Dan Cronin did a fine piece of work Monday, in capturing three cattle thieves with ten head of cattle in their possession. They were trying to sell the heaves to P. J. Russell, a local thief for \$200, but Fennell was on, and assisted the officers in landing the would-be sellers.

Two of the men gave their names as Gray and J. W. Riddle. The cattle are the property of Thomas Meinnot of Scipio, Millard county, who is now on his way here to identify them.

The captives are supposed to belong to gang of thieves who live along the lake shore, and the officers feel confident they have a clear case against them.

### THE JUAN POT IS BOILING.

Candidates For the Various Offices Springing Up Everywhere.

Nephi, Aug. 2.—The political pot is on in Juab county and the gentle sizz of political steam is beginning to escape. Candidates for the different offices are bobbing up serenely, and the confidence of the masses depend upon their selection to insure their future happiness. The most important office in the county to be filled this coming election is that of representative to the legislature, and there is so much good Democratic timber to select from that the convention, when it meets, will scarcely be able to make a mistake. At Silver is Hon. C. V. Wheeler, the present representative; at Mammoth, Captain John Condon; at Eureka, Hon. George C. Wheeler; at Hatch, Hon. J. H. McCrystal, County Attorney Pike, N. A. Robertson and others. And at Nephi, Judge F. W. Chappell, the old reliable warhorse; Hon. George C. Wheeler, the nominee may be, he certainly will be one competent to represent this important constituency, and loyally support the cause of silver and Democratic principles.

The Republicans, it is whispered, would trade off everything on their ticket if they could elect their representative from the district. The contingency is about as close as the law giving a bounty on canidare root.

Republican State Committeeman Adams returned from Tintie yesterday, apparently self-satisfied over the political outlook there. He claimed most of the 16 Republicans who were in evidence up there two years ago, can still be depended upon, and he therefore has made a call for a county convention to meet at Eureka, Sept. 3, to elect 15 delegates from this county to the state convention to be held at Salt Lake on Sept. 10. Whoever the nominee may be, he certainly will be one competent to represent this important constituency, and loyally support the cause of silver and Democratic principles.

The case of the Silver City Gold & Silver Mining company vs. Mark K. Love et al. came up for hearing on Monday, and was set for a portion of the decree. No action taken.

### GUILTY OF FORNICATION.

Charley Neighbors Confessed and Received a Five Months' Sentence.

Provo, Aug. 2.—On motion of E. E. Corfman, the case of Kately A. Hines vs. R. S. Hines was set for trial Aug. 15.

Charley Neighbors appeared before Justice Alfred L. Booth this morning for preliminary hearing. After the hearing, the county attorney filed information, and the defendant was arraigned in the district court. He pleaded guilty to the charge of fornication,
